OUR LOGO

The JBC logo is one of the really most distinctive visual identity asset of the JBC brand and this chapter covers how it should be used properly

JBC
JIMIBELLO & CO

JBC
JIMIBELLO & CO.

This might not properly cover the logo anatomy but we tried to breakdown its construction as best as possible.

BACKGROUND COLOUR

The original colour of the logo is Maximum Black and a bit of Red which has a pretty high frequency and possesses a sharp contrast which makes it stand out easily against a lot of coloured backgrounds.

The logo on Maximum Black and a bit of Red is the preferred background colour and it easily blends.

Should one choose to use the black and white version of the logo then a monochromed background will work best.

LOGO LAYOUT

By default, the wide version of the logo is the preferred choice but there are situations which the icon alone might suffice.

Based on the orientation of the material, there are alternative versions which still work best.

CLEAR SPACE

Whenever the logo is used, please always ensure there is clear space around it so there will be appropriate visibility for the logo.

MINIMUM SIZE

When scaling the logo design, it is important to bear in mind, the minimum dimensions of the logo as the legibility of the human eye has a limit which is why we advise the width shouldn't be less than 65px.

The clear space surrounding the logo should not be smaller than the size of the space marked "X" above.

MINIMUM SIZE

1 Inch or 65px

TYPOGRAPHY

Raleway is an elegant sans-serif typeface family. Initially designed by Matt McInerney as a single thin weight, it was expanded into a 9 weight family by Pablo Impallari and Rodrigo Fuenzalida in 2012 and iKerned by Igino Marini.

It is a display face and the download features both old style and lining numerals, standard and discretionary ligatures, a pretty complete set of diacritics, as well as a stylistic alternate inspired by more geometric sans-serif typefaces than its neo-grotesque inspired default character set.

It also has a sister family, Raleway Dots.

TYPE HIERARCHY / SCALE

One of the most important techniques for effectively communicating (or “honoring”) content is the use of typographic hierarchy.

Typographic hierarchy is a system for organizing type that establishes an order of importance within the data, allowing the reader to easily find what they are looking for and navigate the content.

It helps guide the reader’s eye to where a section begins and ends, whilst enabling the user to isolate certain information based on the consistent use of style throughout a body of text.

- Robert Bringhurst: The Elements of Typographic Style

“Typography exists to honor content.”

COLOUR PALETTE

Asides from the logo, the JBC brand colour is one of the most distinctive visual identity asset of the JBC brand as it is a coloured Black - (DARK LIVER)

COLOUR PALETTE

For a more uniform and harmonious presentation of the JBC Brand, colour consistency was a primary factor we took into consideration.

Seeing how the JBC brand colour is BLACK (DARK LIVER) - making a list of colours it could be combined with Maximum Red. On use of colours - we will advise to use the brand colour sparingly as it possesses a sharp contrast.
